Growing conditions: Finally! Mother nature ended the drought with 200% of normal rainfall, Combined with a cool spring and warm (not hot) summer led to the latest harvest ever at Victor Hugo! Judicious thinning allowed the grapes to be harvested at optimum maturity producing beautiful wines.

Winemaking: The grapes were hand harvested, then crushed into a stainless fermentor. 24 hours later, the must was inoculated with D80 yeast then pumped over twice daily for 14 days prior to pressing. After completion of malo-lactic fermentation, this merlot was aged for 20 months in French and Hungarian oak prior to bottling.
